

Ways to Get Good

Hey all,

Coding is hard. A great way to get good at it is to practice.

A great website (with **short** problems to solve) to use is [CodingBat](#). Make an account (to save your progress and old solutions).

Start with sections:

- 1] For basic if/else practice - "Warmup 1"
- 2] For basic String practice - "String 1"

These problems have hints and solutions you can look at to help solve them.
(If you have trouble with these, feel free to email me mrosens1@mail.yu.edu)

Best,

Moshe Rosensweig
