# Student Help

Hey all,

Many of you have emailed me or Aaron asking for our help. We are not always available, but there are additional resources you can use.

[1] YU's **FREE** peer-tutoring program. I have looked over the list of tutors and they all are very qualified to provide any assistance you may require. How do I sign up?

    [a] Go to this website and make an account.

    [b] When you log in, in the "CHOOSE A SCHEDULE:" section, select "Peer Tutoring, Yeshiva College"

    [c] In the following box, select Intro...

    [d] Select a time slot

[2] Ask friends that took this course to help you

[3] Feel free to email me your [code and a description of the issue] / [general coding (concept) question]. I may not always be able to respond (right away), but IY"H I'll take a look

Remember, learning Java is (like) learning a new language. It involves a lot of syntax-semantics and a new way of thinking. It can be done, even if you knew very little / nothing going in.

Best,
Moshe Rosensweig
